

THANK YOU COMMUNITY !

We understand that a lot of the COVID-19 protocols, mandates and isolation requirements don't make sense and we understand that 811 gives different information to different people.

We too find it hard navigating through this but our main goal is to protect our community and to be able to ensure that we have sufficient staff to be able to work and deliver services as required.

We ask that with the changes coming forward people remain diligent at keeping yourself, your family and community safe and healthy. If you feel ill or unwell, please stay home.

We want to thank the community for doing so well during this pandemic and helping one another as well as stepping up as needed. As we move forward we hope you continue to show kindness and understanding to everyone.

Please take care of your mental and physical health. If you find yourself not knowing what to do, you can contact Nurse Paige, the Health Center or the Band Office and we can figure it out together.
